SUMMARY

Junior IT and Cybersecurity professional with experience in Tier 1–3 support, incident response, and security operations. Seeking to apply technical expertise in firewalls, SIEM monitoring, and networking fundamentals as a Network Engineer, SOC Analyst, or Cloud Security Specialist

TECHNICAL SKILLS

Security Tools: Wireshark, Nmap, Metasploit, SolarWinds, Trellix EDR, Splunk Enterprise, CrowdStrike, Snort, Wazuh
Operating Systems: Linux(Red Hat, Kali Linux, Debian, CentOS, Ubuntu), Windows 10/11, MacOS, Proxmox
Programming And Scripting: Python, Java, C++, HTML/CSS, JavaScript, SQL, Bash, Perl, PHP, PowerShell, Git
Software Platform: ServiceNow, Microsoft Entra ID, Active Directory, Microsoft Intune, SharePoint, Slack, Office 365
Frameworks: NIST CSF, MITRE ATT&CK, NIST SP 800-53
Networking & Protocols: TCP/IP, DNS, VPNs, Routing & Switching, IDS/IPS

CERTIFICATIONS

Red Hat Enterprise Linux Automation with Ansible and Red Hat OpenShift
IT Specialist (Pearson VUE/Certiport)
CompTIA A+

PROFESSIONAL EXPERIENCE

CUNY School of Journalism | *IT Technician* | *New York, NY*

Sep 2025 - Present

- Deliver Tier 1–3 technical support for 50+ end users, resolving hardware, software, and network issues, including password resets, device diagnostics, and system configurations
- Utilize SolarWinds Service Desk to log, monitor, and escalate IT incidents, streamlining issue resolution and maintaining detailed incident records
- Strengthen account security by using Google Admin Console to track students' email activity, identify potential issues, and assist in incident resolution

Metropolitan Transportation Authority | *Cybersecurity Analyst Intern* | *New York, NY*

Jun 2025 - Sep 2025

- Analyzed and triaged over 100+ cybersecurity alerts weekly, supporting incident response and digital forensics efforts by documenting findings for escalation to senior analysts
- Configured and deployed Palo Alto 3020 and 5020 firewall rules to enforce network segmentation and enhance perimeter security, helping reduce potential attack surface
- Leveraged Splunk to create 25+ custom queries and dashboards, correlating threat intel across multiple sources to enhance real-time threat detection and risk mitigation

Mayor's Office of New York City | *IT Support Specialist* | *New York, NY*

Sep 2024 - May 2025

- Implemented role-based access controls for 200+ users using Active Directory and Microsoft Entra ID, thereby strengthening security measures by 20%
- Automated ticket workflows and configured priority-based routing in ServiceNow, reducing average response time by 25% and resolving over 95% of tickets within SLA targets
- Conducted scheduled system checks and patching to minimize security risks, ensuring strong cyber defenses and effective incident handling

TECHNICAL PROJECTS

Configured and Deployed Palo Alto 3020 Firewalls | Tools: Palo Alto 3020, Panorama, NAT, High Availability

- Improved security posture by configuring Palo Alto 3020 firewall with custom security zones, NAT, and HA, reducing downtime risk.
- Used Panorama to centrally manage and deploy firewall rules across devices, streamlining policy updates.

Digital Forensic Imaging and Evidence Preservation | Tools: FTK Imager, Forensic Falcon Neo

- Performed forensic imaging using FTK Imager, ensuring the integrity and preservation of digital evidence for further analysis.
- Isolated and documented critical evidence for malware and intrusion analysis, preserving 100% data integrity across multiple forensic acquisitions.

EDUCATION

John Jay College of Criminal Justice, City University of New York

Dec 2026

Bachelor of Science, Computer Science and Information Security

Borough of Manhattan Community College, City University of New York

Dec 2024

Associate in Applied Science, Computer Information Systems
